Education

La Consolacion College Biñan - BS Computer Science (GPA 1.3)

2023 - May 2027

Thesis: Multi-Layered Architecture for Culturally Grounded Behaviors of Philippine Lower Mythological Creatures

Work Experience

CloudSwyft Global Systems, Inc.

Manila, Philippines (Online)

Software Engineer Intern - Power Platform & Systems Automation

July 2026 - September 2026

Built CRM and automation workflows using Power Apps, Power Automate, and SharePoint, covering lead, support, communications, and reporting processes.

- Engineered inbound web/email pipelines and a 10-entity CRM architecture with automated categorization, record creation, and lead-to-client conversion.
- Developed a threaded communications hub in Power Apps featuring conversation reconstruction, chronological message sequencing, unassigned ticket triage, priority and assignment handling, and in-app notification flyouts with deep linking.
- Developed analytics dashboard for ticket handling, assignments, pipeline activity, customer satisfaction, and campaign engagement

Key Projects

TindAI: Local AI Inventory System for Sari-Sari Stores

May 2026

An offline-first inventory and transaction management system designed for sari-sari stores, using local AI.

- Developed a local AI-assisted workflow for checking inventory, recording transactions, and tracking customer debt without relying on cloud services or a constant internet connection.
- Designed natural-language interactions that allow store owners to retrieve stock information and manage routine store records using simple conversational queries.

GenAI B-Roll Sourcing Pipeline (Pexels + Qwen3.5)

March 2026

Built a GenAI-augmented pipeline using Pexels API, Python, and a locally hosted Vision LLM (Qwen3.5 35B A3B Q6_K via LM Studio) to automate and accelerate B-roll sourcing from text script

- Designed a fault-tolerant ETL pipeline for script parsing, keyword extraction, media retrieval, and AI-based ranking, using caching, JSON validation, retry logic, and concurrent processing to reduce runtime from ~30 minutes to 7-10 minutes.
- Reduced manual B-roll sourcing time by 45-60%, cutting a 10-minute video workflow with ~300 clips from 4+ hours to 1-2 hours.

MERN E-Commerce Product Store

November 2025

Full-stack e-commerce application for product management, authentication, and customer shopping workflows.

- Built JWT-based authentication, role-based access control, REST APIs, and MongoDB schemas for users, products, and cart management.
- Developed a responsive React frontend with Zustand and integrated Multer + Cloudinary for product image uploads and CDN storage.

Leadership & Activities

Treasurer - IGen Society & Media Faculty, La Consolacion College Biñan

2023 - 2026

- Managed budget, video editing, and media coverage for campus programs and events.

Certifications

Advanced Data Analysis and Visualization Using Microsoft Excel - Microsoft & CloudSwyft

Sept 2026

Skills & Interests

Language & Frameworks: Python, JavaScript, TypeScript, Java, PHP, C++, React, Next.js, Node.js, Express.js, Power Fx, Power Apps, Power Automate

Data & Cloud: MongoDB, SQL, Firebase, SharePoint Lists, REST APIs, JWT, Role-Based Access Control, Power BI

AI & Game Dev: LLM Integration (Claude, Gemini, OpenAI), Local LLMs, Unreal Engine 5, Unity 6, Godot

Languages & Interests: English (Fluent), Filipino (Native) · AI Systems, Workflow Automation, Gaming, Cycling
